7 x 57 R

The rimmed version of the 7 x 57, which was introduced in 1893, was developed for combination hunting rifles.

The hunting use has always had priority here – although the calibre has lost its importance for shooting with modern weapons today. With the 165 gr Softpoint bullet GECO is offering a standard load, which meets all requirements. With well-aimed hits, the effectiveness is immaculate. Therefore, the GECO ZERO (lead-free) with a weight of 127 gr is available in this calibre.

GECO Softpoint

Thousands of roe deer have been shot with the legendary GECO Softpoint bullet which is suitable for universal use and in almost any hunting situation. It responds reliably in the game's body and has good target ballistic effectiveness. The thin walled jacket of the bullet is the secret of this successful design, deformation is initiated by the marked lead tip and then the jacket responds to the increased resistance, even with heavy game the deformation process remains well controlled.

Construction GECO Softpoint bullet

Universally usable and copes with almost any hunting situation.

1. **GECO Classic Tip:** For safe deformation and stability
2. **GECO Lead Core:** For a well-balanced performance
3. **GECO TS Jacket:** For precision and barrel protection
