7 x 64

The 7 x 64, which was introduced in 1917, is the most used hunting rifle cartridge in the Central European region. It was developed from the 7 x 57, which was already introduced in 1892. It is suitable for any cloven-hoofed game.

With the 165 gr GECO Softpoint bullet as well as with the 155 gr GECO Express and the 170 gr GECO Plus it becomes an all-round cartridge in Central Europe for the hunting use. In 2015 GECO introduced the lead-free GECO ZERO with 127 gr.

For training and competitions, there is also the 127 gr GECO sports bullet in a 50 pack.

GECO Plus

The GECO Plus is a precise projectile designed using the latest technology. The GECO bonding technique is characterised by the extremely strong solder joint between the projectile core and jacket. As a result of this the GECO Plus mushrooms with minimum fragmentation and has excellent penetration even in heavy game or if striking bone. The breaking points visible on the jacket control the deformation and ensure the bullets effectiveness.

Construction GECO Plus bullet

For deep penetration with absolutely minimum carcass damage for deer or even larger game.

1. **GECO Performance Point:** For precision and safe deformation
2. **GECO Grooves:** For controlled effectiveness
3. **GECO Bonding:** For deep penetration and venison protection
