9.3 x 74 R

The 9.3 x 74 R is the “queen of the rimmed cartridges”. It is suitable for break-open guns, no matter whether break-open rifle, over-and-under shotgun/rifle combination, drilling or double rifle. In combination guns hunters like to use it with a smaller cartridge suitable for roe deer (e. g. in a barrel insert).

This calibre is the companion version of the 9.3 x 62, and they both were introduced at about the same time in 1905.

The GECO Softpoint load with a 255 gr bullet weight is popular for drive hunting. Beyond that, the GECO Plus bullet with 255 gr is being produced and for all hunters shooting lead-free ammunition we offer GECO ZERO with a weight of 184 gr.

GECO Plus

The GECO Plus is a precise projectile designed using the latest technology. The GECO bonding technique is characterised by the extremely strong solder joint between the projectile core and jacket. As a result of this the GECO Plus mushrooms with minimum fragmentation and has excellent penetration even in heavy game or if striking bone. The breaking points visible on the jacket control the deformation and ensure the bullets effectiveness.

Construction GECO Plus bullet

For deep penetration with absolutely minimum carcass damage for deer or even larger game.

1. **GECO Performance Point:** For precision and safe deformation
2. **GECO Grooves:** For controlled effectiveness
3. **GECO Bonding:** For deep penetration and venison protection
